

Hydraulic Trolley Jacks

- Careful design and excellent production quality thanks to the use of ultimate technologies.
- The MEGA designing department has thought about every detail with care and we have built it with robustness and materials designed to extend its life.
- Reinforced structure for intensive use in heavy work.
- Greater width of tracks for greater stability.
- The ergonomic handle allows handling from any position.
- Larger wheels for better mobility and support on uneven pavements.
- Polyamide wheels that improve maneuverability, do not damage the floor, do not rust and are silent.

Capacity (t)		2	3	4	6	10	15	20
